Subject: Someone from NJIT to call

A professor or researcher from NJIT (whose name went by too quickly for me to write down) called and asked how he can get involved in the technical work of the Lower Passaic River. He already knew that de maximis is doing the work on the 17-mile RI/FS and also had Bill Potter's name. I told him that EPA's work is being done through contractors, so he would have to talk to you to see if there are any opportunities to "get involved". I'm pretty sure he's calling you or Bill right about now. (Sorry.)
